RENEWABLE ENERGY

Northacre Renewable Energy - Statement on Planning Decision – 21/02/23

Northacre Renewable Energy Limited welcomes the decision of the Planning Inspector to grant permission for an amended energy from waste facility (Moving Grate Technology) at its development site in Westbury. This represents the end of the consenting process for the proposed facility. NREL development partners will take the time to consider our next steps to divert local waste from landfill and provide low-carbon energy to the homes of Wiltshire.
